Experience

Software Developer (Research Fellowship) | Mobeybou-OUT May 2025 – December 2025

- Lead developer for the educational application Mobeybou in China.
- Developed and maintained new and existing applications using **Unity** and **C#**.
- Conducted tests across Android, iOS, macOS and Windows.
- Managed publishing and distribution.
- Used Git for version control and coordinated technical requirements across a multidisciplinary team.

Education

MSc. in Computer Science and Engineering 2021 – 2024
Instituto Superior Técnico

Erasmus Exchange Programme 2022 – 2023
Technische Universität Graz

BSc. in Computer Science and Engineering 2016 – 2021
Instituto Superior Técnico

Projects

MobeybouAR | Portfolio

- Mobile AR application developed for research project Mobeybou-OUT in **Unity** with **AR Foundation**.
- Early versions used **Firebase** Storage and Realtime Database to exchange data between devices.
- Validated through user tests with an elementary school class.

Community Aquarium | GitHub

- Small personal project to learn **React JS** and **Tailwind CSS**. Work in progress.
